

Chronograph Instructions (2)

Normal position

Before setting the time please make sure the stopwatch function is off and the second hand pointing to "0", otherwise please follow steps below:

- 1 Pull out the crown fully to P2,
- 2 Press A to turn second subdial anti-clockwise to "0"
- 3 Press B to turn second subdial clockwise to "0"
- 4 Push the crown back when finished.

Date Setting: Pull out the crown halfway to P1 and rotate the crown to set the date, do not set the date between 9:00PM and 1:00AM otherwise the date setting may fail.

Time Setting: Pull out the crown fully to P2 and rotate the crown clockwise to set the time.

Stopwatch:

General Timing Records: Press A to start, press A again to stop, press B to reset.

Cumulative Timing Records: Press A to start, press A again to suspend, press A once more to restart. Repeat pressing A to suspend and restart as your need. Press B to reset.

Split Timing Records: Press A to start, press B to record split time, press B again to release, press B once more to record another split time, repeat pressing B to record more split time as you need, press A again to stop, press B to reset.

AC functions is available if stopwatch hand position is disorderly:

Pressed A & B at the same time for 2 seconds then release, stopwatch hand will move back and return to where it was.
